BEST PRACTICE FEATURES OF JALITE SAFETY SIGNS

1. High optical brightness border to provide contrast with surroundings and safety color.

2. ISO Graphical symbol with good recognition and comprehensibility using ISO 7010/NFPA 70.

3. High quality material options: Self adhesive vinyl and Aluminum. Choose between them with consideration for service environment and ease of installation.

4. Sign and graphical symbol size options available to respond to the expected observation distance.

5. Key Graphical elements to improve understanding and design.

6. Designed according to the principles of ISO 38641 and 3864-3 - Geometric shape, graphical symbols and layout.

7. Color according to ANSI Z535.1: Safety color code

8. Explanatory supplementary text define and refine the safety message. Font style and size as required for ease of legability.

9. Photoluminescent Material Code, proven performance and consistency and classified according to ISO 17398.

10. Manufacturer's name and trade mark as required by all ISO Standards for safety products.

11. Optional sub surface print for floor and other high wear applications.

12. Traceability mark to identify production information during manufacture according to ISO 9001 quality standards.

13. Unique design and product code for reordering and product identification.

6043D

Best Practice.

Size:
6in.x 8in.

SBV6043D or SBA6043D
Flag: SBA6043FSD
Panoramic: SBA6043PD

SBV6044D or SBA6044D
Flag: SBA6044FSD
Panoramic: SBA6044PD

Size:
4in.x 12in.

SBV6047PT or SBA6047PT
Flag: SBA6047FSPT
Panoramic: SBA6047PPT

SBV6048PT or SBA6048PT
Flag: SBA6048FSPT
Panoramic: SBA6048PPT

Common Practice.

Size:
6in.x 8in.

SBV6045D or SBA6045D
Flag: SBA6045FSD
Panoramic: SBA6045PD

SBV6046D or SBA6046D
Flag: SBA6046FSD
Panoramic: SBA6046PD

Size:
4in.x 12in.

SBV6049PT or SBA6049PT
Flag: SBA6049FSPT
Panoramic: SBA6049PPT

SBV6050PT or SBA6050PT
Flag: SBA6050FSPT
Panoramic: SBA6050PPT

Enhance Visibility

Use double sided aluminum flag mounted or panoramic signs to overcome the difficulty of seeing safety signs in corridors and large open areas.
Flag mounted signs protrude perpendicular to the wall and are ideal for installation in a corridor, while panoramic signs place each face at an angle to the wall enabling the sign to be seen from a full 180°.

Flag mounted Signs
Use code: FSD or FSPT

Panoramic Signs
Use Code: PD or PPT

Ask about our code compliant, energy saving EXIT signs.

CAUTION: Minimum 54 lx (5fc) external ambient illumination is required to charge this sign in the event face are at to be left for longer periods.
