

The New Jalite Aluminum UL-Listed Exit Signs Provide Maintenance, Life Cycle & Energy Cost Savings

“The savings in inspection time alone make these worth it.”
 —Craig Wagner, Staff Electrician, Middletown School System

• Reduce Required Maintenance

The most overlooked costs to exit signs are the monthly and annual inspections required by code, and the replacement of bulbs and batteries. Once Jalite signs are installed, there are **NO tests to perform and NO batteries or bulbs to change.**

“When the lights go out, ours go on.™”

• Emergency Preparedness

Jalite UL-Listed Exit Signs do more than meet code; they ensure your facility is prepared for the worst case scenario. If the lights are on prior to a power outage, Jalite Exit Signs will illuminate the location of the exit without fail. We mean it when we say, “When the lights go out, **ours go on.™**”

• Use Less Energy

Charged by the existing ambient light of your facility, Jalite Exit Signs require no additional energy. Jalite Aluminum Exit Signs have an expected lifecycle twice that of a LED or other electrical exit sign, thereby further reducing your life cycle cost.

• Code Compliant

All of Jalite UL-Listed ISO Symbol Exit Signs are tested and listed by Underwriters Laboratory and are sure to meet code—both the NFPA Life Safety Code 101 and the International Building Code. Reference the UL-924 Standard when specifying the required exit signs in your facility.*

• ISO Sign Usage

The International Standards Organization and the National Fire Protection Agency have assigned this symbol, commonly referred to as the “Running Man”, to communicate the location of an EXIT. The use of a symbol, rather than text, ensures it will be recognized by people from anywhere in the world. Listed by Underwriters Laboratory to meet the UL-924 standard you’re assured this sign will meet code.

Jalite ISO/NFPA Symbol Signs are ideal in identifying the exit as they use the internationally accepted symbol for Exit as per the ISO and NFPA standards. **UL4973AS shown with black wall mounted frame FO34B.**

**A minimal amount of light (5 foot candles of fluorescent light) is required on the face of the sign. If you're still unsure, give us a call.*

Item No. **UL4343AS**
380x230mm

Item No. **UL4973AS**
380x230mm

Item No. **UL4344AS**
380x230mm

- Signs are provided with screw holes for installation without a frame.

SIMPLE BUT ELEGANT INSTALLATION

- Specially-designed hardware keeps screws hidden from view.
